---

## Special Virtual Environment

---

Same as EZU.

## Application Description

---

Course Bench is a comprehensive platform designed to enhance the learning experience for students and instructors alike. Our mission is to provide a user-friendly, efficient, and engaging environment for both students and instructors to find, review, and manage courses. With Course Bench, students can access a vast array of courses offered by various institutions, along with detailed information about each course, such as course descriptions, prerequisites, and instructor profiles. Our platform allows students to search for courses based on their interests, academic goals, or specific course criteria. Furthermore, students can read and write reviews for instructors, helping them make informed decisions when choosing courses. Instructors benefit from Course Bench as well. Our platform offers a suite of tools to help them manage their courses, such as creating and updating course information, monitoring student enrollment, and tracking student progress. In addition, Course Bench allows instructors to receive valuable feedback from students, which can help them improve their teaching methods and course materials.

## Authentication and Authorization Scheme

---
